Sustainability

Corrie MacColl is committed to promoting, developing and implementing the sustainable and responsible use of natural rubber throughout its supply chain.

Please refer to our Sustainable Natural Rubber Supply Chain Policy (SNRSCP) for further information.

Sustainability highlights:

- 70% of our land remains unplanted
- 25,000 ha Community Forest
- No peat land
- Commitment to no slash and burn
- Commitment to good agricultural practices and yield improvement
- Ensure responsible land acquisition and use
- Develop and implement proper land use plans to prevent overexploitation of natural resources using an integrated landscape management approach
- Support the development of methods to trace natural rubber across the supply chain
- Initiatives governed by an independent Cameroon Sustainability Council
Cameroon Outgrower Programme

Corrie MacColl recognises the value of smallholder partnerships in opening new market opportunities and strengthening rural economies.

- 13,000 families to benefit
- 27,000 hectares of fallow land to be planted
- Initial development target of 750 hectares in 2019
- All land must comply with our Sustainable Natural Rubber Supply Chain Policy (SNRSCP)
- Land within High Conservation Value or High Carbon Stock areas will be exempt, and appropriate land deeds must be secured prior to development

Integrated Farming Plan

![Diagram of integrated farming plan]

- Rubber Trees 8m x 2.5m
- Years 1-3 Intercrop with Plantain, Maize, Red Beans, Groundnuts or Watermelon
- Chicken 150 pc
- Cattle 9 pc
- Fish 300 pc
